Title

2. Pursuant to M.P.E.P. §606.01, this title has respectfully been changed to read as follows:

-- SYSTEM AND METHOD FOR DOWNLOADING DATA TO A MOBILE WIRELESS UNIT USING OVER-THE-AIR PARAMETER ADMINISTRATION SERVICES --

Citation of Pertinent Art:

7. The following prior art made of record and not relied upon are considered pertinent to applicant's disclosure. Copies of Non-Patent Literature documents cited will be provided as set forth in MPEP§ 707.05(a):

- A. RFC 2604: Wireless Device Configuration (OTASP/OTAPA) via ACAP, Gellens, R., Qualcom June 1999, p. 1-29.

Gellens discloses receiving data download comprising loading all required provisioning information into a provisioning server (p. 7); wherein the mobile station and the provisioning server authenticate, and all required provisioning information is downloaded into the mobile station (p. 7); the Over-the-Air Parameter Administration (OTAPA) feature allows wireless service providers to update configuration data a number assignment module (NAM), IMSI, and Roaming List information in the mobile station remotely without the intervention of a third party (p. 6); providing a notification to the MS after the provisioning server has the updated configuration data; the MS may be configured with a recheck interval by which the mobile station checks in periodically to see if anything has changed at the provisioning server, the time of day and/or day of week that such rechecks should occur could be included in the provisioning data (p. 8, 10); As a standard ACAP server, the provisioning server includes configurable datasets ("data structure") and dataset inheritance for the management of the data stores(p.

Art Unit: 2142

12); ACAP organizes data by datasets, the structure of a dataset is defined by the dataset class (p. 13); containing preferred data download, e.g. roaming lists (p. 14); provisioning information is located in the "OTAP" dataset class; the prefix "Provision." is used for items that are to be downloaded to the mobile, and the prefix "Client." is used for items which the client stores on the server (p. 15); depending on the OTAPA update procedures chosen (e.g., SMS, CLID, periodic recheck), the administrative client may be involved in initiating the activity. This may or may not use an interface to the provisioning server (p. 20).

B. Over-the-Air Service Provisioning of Mobile Stations in Spread Spectrum Systems, 3erd Generation Partnership Project 2 "3GPPG", Dec 1999.

The preferred roaming list consists of two tables: The system table and the acquisition table. The system table contains records. Each record identifies a system by its SID and NID. For each record, there is an indicator of whether the system is preferred or negative, the roaming status that should be indicated by the mobile station, the relative priority of the system, and its geographic region. Each record also contains an acquisition index, which indicates a record in the acquisition table to be used. The acquisition record provides the band and frequencies that the mobile station is to use when attempting to acquire the system. (Annex C, page C-1) The mobile station can then use the acquisition table entry to determine the frequencies, which should be used when attempting to acquire the preferred system. (Annex C, page C-2) ACQ_TABLE - Acquisition Table. This field contains acquisition records. The number of acquisition records is specified by NUM_ACQ_RECS. The acquisition record formats are specified in 3.5.5.2. Table C.1-2 illustrates the acquisition table. The records in the acquisition table are in order of priority (highest priority first) according to desired mobile station system selection scan order. ACQ_TABLE contains more than one acquisition record, these records should be listed in priority order (highest priority first) according to the desired mobile station system selection scanning priorities (see page 3.44).

4. Any comments Applicants considers necessary must be submitted no later than the payment of the Issue Fee and to avoid processing delays, should preferable accompany the Issue Fees. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance".
